

Austria low temperature lithium battery project address

Who is European lithium?

European Lithium is a listed (ASX: EUR) (FRA: PF8) (OTC: EULIF) mining exploration and development company focusing on its wholly owned Wolfsberg Lithium Project in Austria. We aim to be the first local lithium supplier into an integrated European battery supply chain.

Is Austrian mining a sustainable source of lithium?

"This is a significant milestone towards sustainable production of lithium from Austrian mining extraction in an integrated European supply chain located in the heart of Europe," Sage said.

What is European lithium's Wolfsberg Lithium Project?

Having lagged behind, Europe is now investing billions of Euros to transform its auto industry and become a leader in electrified mobility. European Lithium's Wolfsberg Lithium Project is in the heart of Europe's burgeoning cluster of battery manufacturers. Confirmation *You agree to add your personal information to our mailing list.

Who is Wolfsberg lithium?

We aim to be the first local lithium supplier into an integrated European battery supply chain. Located 270km SW of Vienna, in Carinthia, Austria, Wolfsberg is a hard rock lithium deposit with historical exploration a JORC resource, with exploration upside.

Will CRML deliver a feasibility study for the Wolfsberg Lithium Project?

CRML is also expected to deliver a new definitive feasibility study for the Wolfsberg lithium project in the first quarter of 2025, incorporating a second mineralized zone that could potentially double the current resource of 12.9 million tonnes at an average lithium oxide grade of 1% and support a mine life of 20 years.

Why is Europe investing billions in Li-ion batteries?

The clean energy revolution has created a need to secure lithium supply, a key component in the dominate Li-ion battery space and satisfy growing Global and European demand. Having lagged behind, Europe is now investing billions of Euros to transform its auto industry and become a leader in electrified mobility.

In the study of the effect of low-temperature aging on the thermal safety of LIBs, Friesen A [14] et al. found that lithium metal with high surface area was deposited on the ...
