

Who is Sol Power Engineering Sdn Bhd?

Sol Power Engineering Sdn Bhd also called (SPE) was officially established on 12 June 2019 which is involved in the field of supply, installation, servicing and maintenance of Solar Energy Systems and other renewable energy development. Our target is for Residential and Commercial Building Solar Energy System until Large Scale Solar (LSS) systems.

How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

How long does it take to install solar panels?

The process typically takes between 1 to 3 days depending on the complexity and size of your system. Here's what happens: - Mounting the panels : The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts.

Does Suria KLCC have a commercial based on-grid system?

This project has also won first runner-up in the Commercial Based On-Grid Category of the prestigious Asean Energy Award 2013. The energy generated from this system supplies 30 per cent of Suria KLCC's energy requirement and helps lower greenhouse Carbon dioxide gas emission by approximately 360 tonnes annually.

How do I connect my solar system to the grid?

If your solar system is grid-tied, it will need to be connected to the local utility grid. This step involves: - Net metering setup : Many utility companies offer net metering, which allows you to send excess energy back to the grid and receive credits toward your energy bills. Your installer will set up the appropriate meters for this.

How does a solar panel installation work?

Mounting the panels: The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts. - Electrical wiring : After the panels are mounted, the electrical wiring will be connected to the inverter and electrical panel in your home.
