

What are battery packs?

Battery packs are constructed from two or more individual cells or batteries. There are two basic types of battery packs: primary and secondary or rechargeable. Primary batteries are disposable, non-rechargeable devices. They must be replaced once their energy supply is depleted.

How big is a battery pack?

Each "Blade" is 37.8 inches long, 3.5 inches tall, and only 0.53 inches wide. These individual cells fit together in an array, and then a battery pack encloses them. This kind of cell-to-pack technology maximizes the use of space by over 50% as compared to conventional cylindrical lithium-ion phosphate batteries.

How to choose a battery holder?

The traditional battery holder replaces the traditional ordinary glue, which is the best choice for the battery combination. Battery holder has a card slot on the edge, you can freely combine the battery. Battery pack bracket supports the battery, which makes the battery easy to dissipate and maintain.
