

Battery cabinet production serial number query official website

Where can I find a date code for a lead-acid battery?

Download Battery Builders, LLC date codes for lead-acid batteries. BBI records all serial numbers to assist customers with service needs.

Do banner batteries have a production code?

The production code date of all Banner batteries is encrypted and used only for internal tracking of the batteries. Please understand that we do not decode. Furthermore, the production code only indicates when the battery was manufactured, not when it was filled with acid and charged. There is an extra filling code for this on top of the battery.

How do manufacturers decode serial numbers?

Manufacturers utilize various formats to encode date information within serial numbers. Familiarizing yourself with these formats can simplify decoding. Used by many electronics manufacturers where the first two digits represent the year, followed by month and day (e.g., "190610" means June 10, 2019).

How to determine the function of a battery?

Decisive for the function of the battery is not the date of production or the first filling with acid, but the time of commissioning in the vehicle/application. Important: the battery must be kept in a good state of charge during the period between production and sale to the user.

How do I know if a product is a serial number?

The first step is locating the serial number on your product. This can often be found on labels or tags on the device. Familiarize yourself with how different manufacturers format their serial numbers. For example: GE Appliances: The first two letters indicate month and year (e.g., "AD" could mean January 2002 or January 2014).

What determines the battery life?

The battery life is, therefore, mainly determined by the number of discharge/charge cycles as well as the depth of discharge and not by the physical age of the battery. Please note: Proof of guarantee and warranty is solely the purchase receipt with the date of purchase.
