Battery finished product testing cabinet

What are the components of battery testing cabinet?

The battery testing cabinet consists of clamps, constant current and voltage charging source, constant current discharging source, registration control circuit, current sampling circuit, voltage sampling circuit, main control CPU, data storage system, microcontroller (MCU) program and control panel, ventilation system.

What is the lithium battery charge and discharge capacity tester?

The lithium batterycharge and discharge capacity tester for finished battery pack is a smart and accurate device for battery pack production line. The aging cabinet is mainlyused to test the charging and discharging cycles of the finished lithiumbattery pack. The aging cabinet adopts PLC and industrial-grade touch screencontrol system.

What is battery testing system?

It is mainly composed of computer system and control softw This testing system is used for pre-charging activation of lithium battery and capacity sorting of finished battery. It is mainly composed of computer system and control software, communication interface and battery testing cabinet.

What is a battery charge and discharge tester?

The battery charge and discharge tester for finished battery is a smart and accurate equipment. It is mainly used for the cycle charging and discharging testing of the finished lithium battery pack. Email: timi@winack.com Get a Free Quote Toggle navigationNAVIGATION Home About us Products Battery Insulation Cushion Machine

What are the characteristics of lithium battery aging testing machine?

The lithium batteryaging testing machine Characteristic: 1. Real-time monitoring system operating status, with complete alarm protection device. 2. In network mode, you can connect automatically without manual connection. 3.

What is 5v3a cylindrical battery testing system?

Product description: This 5V3A cylindrical battery testing system is used for pre-charging activation of lithium battery and capacity sorting of finished battery. It is mainly composed of computer system and control softw This testing system is used for pre-charging activation of lithium battery and capacity sorting of finished battery.

Dedicated products and service for UK Businesses. Need Help? Call, Chat or Email our dedicated team. Volume discounts. ... Outer walls are made of 12/10th-grade steel and finished with white ...

After-sales Service: 12 Months Warranty & Life-Time Sale Service Warranty: 1 Year Type: Finished Batteries Tester Test Region: All Application: Lithium-ion Battery ...
