Battery fluid hole plug

What is a filling plug?

The heart of our products is the filling plug, which is inserted into the cell opening of the battery and regulates the level of the fluid. In addition to the classic lead-acid battery, which uses dilute sulfuric acid as the electrolyte, we can also offer filler plugs that use caustic (alkaline) as the electrolyte (NiCd, NiFe batteries).

Which battery filler plugs are available?

In addition to the classic lead-acid battery, which uses dilute sulfuric acid as the electrolyte, we can also offer filler plugs that use caustic (alkaline) as the electrolyte (NiCd, NiFe batteries). Our current filling plug is originally from the production of Rover & Rover GmbH.

What is BFS - battery filling system?

bfs - the battery filling system. A synthesis of technology and design | BFS and the sliding tool. safe and comfortable. flow-indicator and filter offers higher safety and comfort. even with gloves. Plug IV was developed to complement the extremely successful bfs Plug III.

How does plug IV work?

The labyrinth optimizes condensation and returns water to the battery, thus making the intervals between watering longer. The new patented injection systemdesigned for Plug IV makes for even faster filling and an extremely broad filling pressure range of 0.2 to 3.8 bar (2.9 to 55.1 psi). No pressure regulator necessary.

How do I install a vent plug?

Instructions are included to advise of the proper assembly. A) Twist off the vent plug from the positive terminal cap. B) Insert plug into the non-vent tube port. C) A press fit should be used to properly secure the vent plug into the battery to ensure proper seating into the vent port.

What types of filling plugs does Aquapro offer?

Aquapro offers you a variety of filling plugs, which covers all standard cell openings and application areas. In addition to the classic traction batteries, we also offer solutions for stationary batteries. We manufacture our components internally so that we can respond optimally to your wishes.

You can also find replacement battery fluid for liquid top-ups. Alongside our car battery essentials, you can find charging accessories for battery brands like CTEK, Noco and Granville. You can ...

To install a blanking plug, first, locate the end of the pipe or fitting where you want to place the plug. Ensure that the threads on the plug match those of the pipe or fitting. Then, using your hand, screw the plug into the pipe until it is tight. For a more secure seal, you can use a tool such as a wrench to turn the plug a few more times.
