Do-Fluoride New Energy Technology co.,Ltd. was established in 2010 and is a high-tech enterprise,specializing in the production and development of new power batteries and materials,modules,vehicles battery packs,and other products.

Are rechargeable fluoride-ion batteries the future of electrochemistry?
A new study detailing an electrochemistry advance may nudge one such high-energy-density type,the fluoride-ion battery (FIB),from the drawing board toward application. Rechargeable FIBs,which in theory can hold about eight times as much energy per volume as current lithium ion batteries can,aren't new,but they are uncommon.

The price of lithium hexafluorophosphate product has quintupled since the start of the year as sales of new energy vehicles surge. As a result, raw materials suppliers such as Do-Fluoride are rapidly expanding ...
