

How do I check the battery health of a Windows 10 or 11 laptop?

Here are some useful tools you can use to monitor the battery health of a Windows 10 or 11 laptop. The "powercfg" command in Windows can help you generate a detailed report of your laptop's battery. It includes information about battery performance and lets you observe the decline in battery capacity over time.

How do I Check my battery health?

Press the F2 key repeatedly to access the BIOS/UEFI settings. Locate the Battery Health option, usually under the Overview or General section and review the health status. Select Power and then click About my battery and review the battery health status. Select Battery Information and review the Battery Health status.

Should you check your laptop battery health?

Anyone who's had a laptop long enough to see its battery life dwindle can understand the value of knowing how to check its battery health. After all, a battery's capacity degrades over time, and you'll eventually have to replace it or the laptop. This is the case even with the best Windows laptops once they have a few years behind them.

How do I Read my battery health report?

Open File Explorer > This PC > Windows (C:) and double-click on the "battery-report" file. Step 7. Select your web browser of choice to open the file. Now you have your battery health report, but how do you read it? There are two sections to focus on. The first is "Battery capacity history."

What is batteryinfoview?

BatteryInfoView is a free app that provides comprehensive data about your laptop's battery. On its main page, you'll see details such as Design Capacity, Full Charge Capacity, Battery Health, number of charge/discharge cycles, and more.

What is save battery?

Save Battery is a simple app designed to check laptop battery health, particularly for Windows tablets and Surface laptops. The main screen displays a beautiful, animated charging/discharge status and battery information such as Design Capacity, Full Charge Capacity, last plugged-in/out time, and the approximate remaining time to charge/discharge.
