

What infrastructure is included in the terminal gas Sul LNG project?

The Terminal Gas Sul LNG Project infrastructure includes an ocean terminal, an Energos Winter Floating Storage and Regasification Unit (FSRU), an overall 33km-long, 20-inch pipeline, and related infrastructure. The pipeline connects the facility to the existing inland Transportadora Brasileira Gasoduto Bol#237;via-Brasil (TBG) pipeline.

How much does a PV system cost in Brazil?

The average selling price of energy by PV systems in Brazil was 3.17 ¢/kWh in a recent public auction (MME; EPE, 2018). This value is considered as the reference for comparison with the estimated levelized cost of energy (LCOE) of the proposed floating system.

Who owns terminal gas Sul (Southern Gas Terminal) project?

Terminal Gas Sul (Southern Gas Terminal or TGS) Project is an offshore Liquefied Natural Gas (LNG) import terminal in Santa Catarina, Brazil. The project is owned by US-based energy infrastructure company New Fortress Energy. The Final Investment Decision (FID) on the project was taken in 2021. Construction works commenced in November 2021.

How is the Brazilian electricity market changing?

The Brazilian electricity market is changing as the country expands the generation of weather-dependent renewable energy based on wind and solar power. At the same time, electricity consumption is set to increase significantly in the coming years.

How does the TBG pipeline work?

The existing TBG pipeline exports LNG to the wider LNG market in Brazil. The terminal includes all the necessary infrastructure to receive, store, regasify, and export natural gas. It receives gas via the methane carriers which is then transferred to Energos Winter FSRU via a ship-by-ship system.

How can advanced battery technology be used in Brazil?

Innovative approaches can connect individual areas such as electricity, heating, cooling and mobility. In order to make use of the advanced battery technology, the legal, technical, educational and economic framework conditions in Brazil require analysis and, in part, improvement.

The Terminal Gas Sul LNG Project infrastructure includes an ocean terminal, an Energos Winter Floating Storage and Regasification Unit (FSRU), an overall 33km-long, 20 ...

Chilean utility Colb#250;n has unveiled plans for a massive pumped storage hydropower project in northern Chile. The facility will use desalinated water from the Pacific ...

A study by Clean Energy Latin America (CELA) estimated the Brazilian storage market should grow at least 12.8% annually through 2040, reaching a cumulative 7.2 GW, excluding client-side, "behind-the-meter" ...
