

Buy a new energy vehicle without a battery

Does an electric car need a battery?

We've all heard of electric vehicles, but have you heard of an EV that doesn't need a battery? London-based nanoFlowcell Holdings plc (NFC) has set up a US subsidiary in New York called nanoFlowcell USA LLC, which aims to sell the Quantino twentyfive, an electric sports car without a battery.

Which electric car does not use batteries?

The QUANTiNO twentyfive is the first fully electric car that doesn't use batteries. A compact electrolytic capacitor initiates the nanoFlowcell's 48VOLT E-drive, after which the nanoFlowcell supplies power to the four low-voltage e-motors and the 48-volt onboard electronics. The QUANTiNO twentyfive is unlike any conventional electric car.

Are battery electric cars good for the environment?

BEV's or Battery Electric Vehicles, are becoming increasingly popular due to their environmental friendliness. Electric cars produce zero tail-pipe emissions, meaning they are much better for the environment than traditional gasoline-powered cars. This makes them a great choice for those who want to reduce their carbon footprint.

Do electric cars need to be plugged in?

Finally, an electric car (also known as a battery electric vehicle (BEV) or electric vehicle (EV) relies entirely on a battery pack as its means of propulsion. It must be plugged in when the battery is low on juice. Remember this rule: in a hybrid you cannot plug in, in a plug-in hybrid you should plug in, and in an electric car, you must plug in.

Are electric cars affordable?

Finally, electric cars are becoming increasingly affordable, with several models like the Nissan Leaf, the Chevy Bolt EV, and EUV, and the upcoming Equinox EV, now available at relatively affordable prices. Having said that, how green are these battery powered-vehicles?

Could this be the best electric sports car ever?

Today we're reporting on the arrival of a car that could be the best electric sports car ever - the QUANTiNO twentyfive. Currently being built by nanoFlowcell Holdings Plc, it's a new flow cell electric car with qualities that can only be summarised with the words "better, faster, further". This beast of a motor has been in the works for 25 years.
