How do you calculate voltage / current / resistance / power?

Calculate voltage /current /resistance /power. Enter 2 values to get the other values and press the Calculate button: The current I in amps (A) is equal to the voltage V in volts (V) divided by the resistance R in ohms (O): Example The power P in watts (W) is equal to the voltage V in volts (V) times the current I in amps (A): $P = V \times I$ Example

How do you calculate current in Watts & volts?

The current I in amps (A) is equal to the voltage V in volts (V) divided by the resistance R in ohms (O): Example The power P in watts (W) is equal to the voltage V in volts (V) times the current I in amps (A): $P = V \times I$ Example Enter 2 values of magnitude+phase angle to get the other values and press the Calculate button:

How do you find a voltage drop using Ohm's law?

Find out the resistance of the resistor. Measure the current through the resistor using an ammeter. Multiply the current by the resistance to get the voltage drop using Ohm's law. Ohm's Law calculator let's you explore the relationships between power,voltage,current,and resistance.

How do you calculate electric current in amps?

You can also calculate electric current in amps if you know the power drawn from the circuit using the Watt's Law power formula. The power formula states that the current in amps is equal to the power in watts divided by the voltage. $I (A) = P (W) / V (V)$

How do you calculate current in ohms?

The Ohm's Law formula to calculate current is $I = V/R$, where I is the current through the conductor in amps, V is the potential difference across or voltage across the conductor in volts, and R is the resistance of the conductor in ohms. $I = V / R$

What is a voltage formula?

The voltage formula is one of three mathematical equations related to Ohm's law. It is the formula provided in the previous paragraph but rewritten so that you can calculate voltage on the basis of current and resistance, that is the voltage formula is the product of current and resistance. The equation is: This value is measured in volts.
