Canberra energy storage project subsidy policy

Will Canberra benefit from subsidised solar power system battery storage?
More than more 5,000 homes and businesses in Canberra will benefit from subsidised solar power system battery storage over the next 4 years. Announced last week, Minister for the Environment Simon Corbell said the ACT Government will support 36 megawatts of battery storage through a renewables auction program commencing in 2016.

How will Canberra's new battery storage system work?
The large-scale battery storage system will deliver 250 megawatts (MW) of power,store renewable energy and support grid reliability. This is enough energy to power one-third of Canberra for two hours during peak demand periods. Behind-the-meterbatteries will be installed to help power essential services across nine government sites.

Will Canberra's energy supply be future-proofed?
The ACT Government is future-proofing Canberra's energy supplyby expanding its renewable energy storage with a new partnership with global specialist energy storage business,Eku Energy,launched by Macquarie's Green Investment Group.

What is Act's next generation energy storage grant program?
The third stage of the ACT's Next Generation Energy Storage grants program has been provided more than $3 million in funding for battery system subsidies. Through all stages of the program, up to 36 megawatts of distributed solar battery storage will be installed in up to 5,000 ACT homes and businesses by 2020.

Which Australian government has introduced subsidised energy storage?
The only other Australian government to introduce subsidised energy storage to date is Adelaide City Council,which is offering up to $5,000 for the installation of battery systems associated with solar panels in Adelaide City.

What is the act doing to secure Canberra's energy supply?
Generic artist impression of a utility scale battery project. The ACT Government is further securing Canberra's energy supply with a new long-term partnership with Macquarie's Green Investment Group global specialist energy storage team, Eku Energy.
