

What is aluminium capacitor?

Aluminum is a workhorse material for making the majority of capacitors. noun. ['w?:k?h?rs'] a horse used for plowing and hauling and other heavy labor.

How are the materials and chemicals used in our aluminum electrolytic capacitors adapted?

Materials and chemicals used in our aluminum electrolytic capacitors are continuously adapted in compliance with the TDK Electronics Corporate Environmental Policy and the latest EU regulations and guidelines such as RoHS, REACH/SVHC, GADSL, and ELV. MDS (Material Data Sheets) are available on our website for all types listed in the data book.

What is a plate capacitor?

Plate capacitor with a voltage between the two electrodes. The distance between the electrodes is and the area of an electrode is . In between is a dielectric material . A plate capacitor usually consists of two round or rectangular conductive plates (also called Electrodes). These have an area and are located at a distance from each other.

How to handle aluminum electrolytic capacitors?

Nevertheless, the following rules should be observed when handling aluminum electrolytic capacitors: No electrolyte should come into contact with eyes or skin. If electrolyte does come into contact with the skin, wash the affected areas immediately with running water. If the eyes are affected, rinse them for 10 minutes with plenty of water.

Which capacitors are in stock at Mouser Electronics?

Capacitors are in stock with same-day shipping at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for many capacitor manufacturers including KEMET, KYOCERA AVX, Murata, Nichicon, Panasonic, Taiyo Yuden, TDK, Vishay and many more.

How do you protect aluminum electrolytic capacitors from halogenated hydrocarbons?

Do not allow halogenated hydrocarbons to come into contact with aluminum electrolytic capacitors. Do not exceed the upper category temperature. Avoid overload of the capacitors. Make periodic inspections of the capacitors. Before the inspection, make sure that the power supply is turned off and carefully discharge the capacitors.
