

Who provides electricity in Cape Town?

Residents of the City of Cape Town metropolitan area are supplied electricity either by the City or by Eskom, depending on the licensed supply area in which they are located. The City provides an energy services social package to low-income households consisting of subsidised grid connections, the lifeline tariff⁵ and FBE allocations.

Will Cape Town release an RFP for 100MW battery energy storage?

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage systems in an effort to bolster energy security.

Will Cape Town reduce load shedding in city supply areas by 2026?

By 2026, operate the distribution system so as to harness dispatchable energy supply and curtailment programmes to allow the City of Cape Town to mitigate up to 4 stages of load-shedding in City Supply Areas between 06:00 - 22:00 on weekdays.

Does Cape Town have energy efficiency programmes?

The City of Cape Town is in a powerful position to implement far-reaching energy efficiency programmes, as it is Cape Town's single biggest employer, and is the service provider for the entire metropolitan area. The City currently has limited capacity to address energy efficiency in its operations.

How does Cape Town use energy?

The City's main functions which use energy include bulk water supply, wastewater, operation of numerous office buildings and workshops, street lighting, fleet operation (5 474 vehicles), and provision of electricity. The City of Cape Town spends over R100 million per year on its own petrol, diesel and electricity consumption.

How can Cape Town extract energy from waste?

Various options are being considered by the City to extract energy from waste. These include waste-to-methane gas, waste-to-energy, co-generation, and sewerage gas energy generation. Source: Scoping Investigation for Energy Efficiency in the City of Cape Town, Energy Cybernetics, 2002.
