

How much does it cost to charge a car battery?

Rapid charging a battery of this size from 10% to 80% requires 52kWh of electricity. At a price of 78.12p per kWh for a rapid charge, the cost of a 70% charge was around £40. This would give the driver a range of around 168 miles. Below are the average costs the RAC has tracked since summer 2022:

How much does it cost to charge an electric car?

The formula for calculating the cost of charging an electric car is simply the price of electricity (pence per kilowatt hour) times the size of the battery. In the case of the Renault Zoe ZE50, this gives a calculation of 28p x 52kWh. This means it costs £14.56 for a full charge.

How do I calculate the cost to charge my electric vehicle?

Instantly calculate the cost to charge your electric vehicle below: Our calculator offers two simple methods to calculate your charging costs: Direct kWh Input: If you know exactly how many kilowatt-hours you need to add to your battery, simply enter this number along with your electricity rate.

How much does it cost to charge a car at home?

It can be very cheap to charge at home, especially if you have an off-peak tariff that allows you to charge your car when demand for electricity is low (at night, for example). While it can cost as little as 7p/kWh to charge at home, public chargers can cost more than 10 times this - 79p/kWh is a typical price for an ultra-rapid public charger.

How much does it cost to charge an EV?

To charge an EV to 80% at a public rapid charger will be substantially more expensive - particularly if you're using the fastest rapid chargers. For EVs with the biggest batteries it could cost over £60 for a 10-80% charge. A few years ago public charging was extremely cheap, but when energy prices soared so did the price of charging.

What is the public charging calculator?

The Public Charging Calculator will help you find out how long it will take to charge your electric car at a slow, fast or rapid charger as well as the cost to charge your electric car. Across the UK, the public network provides invaluable additional charging support to electric car drivers, as well as the opportunity to extend journey distances.

Disclaimer: Charging speeds are estimates and are based on assumptions so should only be used for general comparative purposes. Actual charging rates and speeds depend on vehicle charging ability, "useable" battery, energy loss and ...
