

What is a Columbia battery?

The technology of the Columbia -- a carbon-zinc battery using an acidic electrolyte-- served as the basis of all dry-cell batteries for the next 60 years, until the introduction of the alkaline battery by the Eveready Battery Company (now Energizer) in the late 1950s. [Back to top](#)

Does Columbia offer a lithium battery pack?

Columbia is partnering with Inventus Power, a global leader in the design and manufacture of advanced battery systems, and will be incorporating a lithium battery pack option in our Utilitruck products, beginning in the spring of 2022!

Who invented the Columbia battery?

The trademark "Columbia" was proposed by Nelson C. Cotabish, a sales manager at NCC. In 1896, the company marketed the very first battery intended for widespread consumer use: the sealed, 6-inch, 1.5-volt Columbia battery. NCC was the first company to successfully manufacture and distribute sealed dry-cell batteries on a large scale.

How big is a Columbia dry cell battery?

One obvious and dramatic change in batteries is size. The Columbia Dry Cell was 6 inches long; modern batteries for hearing aids and watches are smaller than 1/4 inch by 1/8 inch. [Back to top](#) [Back to top](#)

Is the Columbia dry cell battery a National Historic Chemical Landmark?

The American Chemical Society designated the Columbia Dry Cell battery as a National Historic Chemical Landmark in a ceremony on September 27, 2005, at Energizer Global Technology Center in Cleveland, Ohio, and Energizer Holdings Inc. headquarters in St. Louis, Missouri. The text of the plaque commemorating the landmark reads:
