

How are charge and discharge settings set up?

The charge and discharge settings in a Open Loop configuration are set up through the controller of the Power Conversion device at the time of installation. In a Closed Loop configuration, charge and discharge settings are dynamically controlled by the BMS of the AES Battery over a connection with the Power Conversion device network.

Do AES batteries work with power conversion and monitoring devices?

AES batteries must be set up to work with Power Conversion and Monitoring devices in either an Open Loop or Closed Loop configuration. The charge and discharge settings in a Open Loop configuration are set up through the controller of the Power Conversion device at the time of installation.

What is volume conversion device ek280?

The volume conversion device EK280 is used to convert the gas volume read from a gas pipe under measurement conditions, into base conditions, as well as to allocate the measured quantities to tariffs. Safety Personnel WARNING!

How do I update the battery firmware?

Consult the Discoverbattery.com website for the latest battery firmware versions. If a battery firmware update is required, ensure this is done by a qualified and authorized person using the AES Dashboard software tool. 9. Recycling and Disposal Batteries must not be mixed with domestic or industrial waste.

What is volume conversion device ek205-m?

The device is designed and constructed exclusively for its intended use as described here. The Volume Conversion Device EK205-M serves to convert a gas volume of a gas line in basic condition measured by a meter in measurement conditions as well as to assign the volumes measured to tariffs.

How do I register a battery?

To register your product you will need the serial number of the battery. Visit discoverbattery.com for registration details. 8.2 Inspection Batteries should be carefully inspected on a regular basis in order to detect and correct potential problems before they do harm. This routine should be started when the batteries are first received.
