

What is a rechargeable battery?

Rechargeable batteries are a type of electrical battery which can be charged, discharged. They have a much lower total cost of ownership instead of constantly having to purchase replacements. They have more of a positive environmental impact, as they can be recharged inexpensively many times before they need replacing.

Should you buy a rechargeable battery?

In some devices, disposable batteries are still the better choice. The good news is that the most power-hungry devices - those which can see you burning through packs of disposables - are the ones you can save a lot of money on when you buy a good rechargeable battery.

How long does it take a rechargeable battery to charge?

Exactly how long it will take depends on the capacity of your rechargeable batteries. In the same charger, higher-capacity batteries will take longer to charge than lower-capacity ones. Other chargers are designed to be left charging overnight - some have auto shut-off functions after certain time periods to minimise overcharging.

Where can I buy rechargeable AA batteries?

At BuyABattery, we are one of the largest sellers of all major brands of rechargeable AA batteries, including Varta, GP and Duracell. We stock the full range in all the sizes you'd expect to find online including both high capacity and standard rechargeable AA batteries
