

Will Croatia build Europe's largest energy storage project?

Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially extendable to 110 MW by 2024.

How much ie-energy aid will Croatia get?

The European Commission has approved EUR19.8 million (US\$20.1 million) in state aid from the government of Croatia to energy storage operator IE-Energy for a series of grid-connected projects. The aid will be a direct grant to IE-Energy and will cover approximately 30% of capital expenditures for a series of grid-scale battery energy storage systems.

Is Croatia ready for solar energy storage?

"There is immense scope for energy storage in Croatia, predominantly for battery storage." GlobalData says that Croatia is now on target to meet its 36.4% renewable energy target by 2030. However, its recent investment in energy storage has not been accompanied by rapid solar PV development.

How much does solar cost in Croatia?

The maximum reference values of market premiums for solar were EUR0.82/kWh and EUR0.75/kWh for wind. The first auction for large-scale projects in Croatia took place in 2022 to procure 638 MW of new capacity. However, it only attracted tepid interest, with premiums awarded to just 107 MW of projects.

Is there a storage facility in southeastern Europe?

There is no storage facility in southeastern Europe yet with such a capacity," Attaurrahman Ojindaram Saibasan, a power analyst at GlobalData, told pv magazine. "There is immense scope for energy storage in Croatia, predominantly for battery storage." GlobalData says that Croatia is now on target to meet its 36.4% renewable energy target by 2030.

How much does hydropower cost in Croatia?

The final average price for the PV technology came in at EUR0.056 (\$0.065)/kWh, while the average price for hydropower was EUR0.158/kWh. The Croatian authorities initially reviewed 144 projects totaling 713 MW for the auction. The tender was carried out in two phases.

The Ministry of Economy and Sustainable Development in Croatia has issued a EUR60 million (US\$66 million) Call for Funds which seeks projects for renewables, energy efficiency and energy storage totalling 20MWh.

(6) Croatia stressed that, according to the Commission's Study on energy storage - Contribution to the security of the electricity supply in Europe 2, the EU will need around 100 GW of electricity storage capacity (batteries and pumped hydro storage), with a large development of stationary batteries, by 2030 to enable its

This paper presents a battery energy storage system (BESS) that represents a novel approach to sustainable energy storage by repurposing end-of-life Tesla battery modules for stationary applications. The modules have been assembled and controlled in a robust and scalable design that offers versatile deployment options and economic benefits.

Energy storage including short duration and seasonal technologies ranging from lithium batteries to hydrogen could help mitigate the impacts of negative power prices in Europe, an analyst has said. The day ...

The Issues Monitor 2022 Croatia Map identifies commodity prices, land and water availability, renewable energies, innovative transport ... a battery electricity storage system, as well as a virtual cross-border control centre. Given that Croatia is not an energy island, but imports about 60-65% of gas and about 30% of electricity, it is clear ...

Earlier this year, Energy-Storage.news reported that Croatia's government would be providing some EUR500 million in financial support for the rollout of large-scale energy storage. Upcoming Event. Energy Storage ...

CROATIA Energy Snapshot Source: Source: DG ENER ... 3. Energy markets(f) s s s Source: Platts analysis for wholesale electricity/gas prices, Eurostat for retail electricity/gas prices 0 100 200 300 400 500 600 1 3 5 7 9 11 1 3 5 7 9 11 1 3 5 7 9 11 1 3 5 7 ... and distribution grids and invest in electricity storage. Step up action to reduce ...

IE Energy, a Croatia -based energy storage operator, is set to build a 50 MW storage project, after securing EUR19.8 million from the Croatian government via state aid from the European...

The Renewable Energy Sources of Croatia says the country's total installed solar capacity now stands at 462.5 MW. ... 29 January 2025 Solar module prices in Europe rose this week for the ...

Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially extendable to ...

As the year comes to an end, PV Tech speaks to sun.store's Agata Krawiec-Rokita about the company's 2024 performance and 2025 prospects.
