solar energy in which solar concentrated thermal energy is one way. Concentrated solar energy is an alternative source for thermal applications with high temperatures like solar cooling, solar cooking, desalination and power generation. To collect solar thermal energy solar concentrators are

For the generation of electricity in far flung area at reasonable price, sizing of the power supply system plays an important role. Photovoltaic systems and some other renewable energy systems are, therefore, an excellent choices in remote areas for low to medium power levels, because of easy scaling of the input power source [6], [7]. The main attraction of the PV ...
