

What are OEM batteries?

Original Equipment Manufacturer (OEM) batteries are either made by the company that makes the device itself or on their behalf by a different company. They are the batteries that come with the device when it's purchased by a consumer and are also sold by the device's manufacturer as 'official' replacement batteries.

How to purchase an OEM battery?

To buy an OEM battery, you need to get it directly from the original equipment manufacturer or the official dealer of that company. The OEM battery is manufactured and installed by the original manufacturer. Keep in mind that purchasing an OEM battery will typically cost more.

What is a non-OEM battery?

A non-OEM battery is a third-party battery, manufactured by companies other than the original equipment manufacturer (OEM). They reverse engineer the original battery and sell it into the market with the same application.

Is batterybuy affiliated with any OEM brands?

Batterybuy.co.uk is not affiliated with any OEM brands. The batteries sold by Batterybuy.co.uk are all replacements. Any referenced product names or trademarks are only intended to show the compatibility of these products with various machines.
