SOLAR PRO. Electric gate valve battery

What is a gate motor battery?

A gate motor battery is a lead-acid battery specifically designed to power an electric gate. It is different from other types of batteries, as it is not meant to store energy like a car battery or a deep cycle battery.

What is a gate valve?

A gate valve is a type of valve that uses a sliding plate within the valve body to stop, limit, or permit full flow of fluids through the valve. The gate is usually wedge-shaped. Gate valves are used when a straight-line flow of fluid and minimum flow restriction are needed. Parallel slide gate valves use system pressure and position to provide positive isolation.

What is electric actuated gate valve?

Electric actuated gate valve is one of the most commonly used cut-off valves, mainly used to connect or cut off the medium in the pipeline, but not suitable for adjusting the flow of the medium. The gate valve is suitable for a wide range of pressure, temperature, and caliber, especially suitable for medium and large-diameter pipelines.

What is a lever operated gate valve?

A lever operated gate valve, such as the JV060036, is a general purpose cast iron gate valve with PN16 flangesthat offers fast opening and closing. It is designed with a chamfered edged polished gate to effectively cut through media with suspended solids, such as wastewater, sludge, biomass, pulp, and powders.

What is a ceramic gate valve?

A ceramic gate valve is a type of valve where the support and opening and closing parts are made of metal, and the sealing pair is a precision-machined structural ceramic. This design allows for a flat contact sealing form, resulting in a straight stroke movement with large shearing force and high strength.

Electric wedge gate valve is a kind of linear motion of the valve, it has to do with Z type rotary actuators are more suitable, had an "on/off" switch and intelligent. This valve is simple is one of the most common opening and closing valve that uses disc and work to get through and shut off fluid medium in the pipeline. Widely used in electric ...
