

What is the batteries regulation?

In line with the circularity ambitions of the European Green Deal, the Batteries Regulation is the first piece of European legislation taking a full life-cycle approach in which sourcing, manufacturing, use and recycling are addressed and enshrined in a single law.

What does the new batteries regulation mean for Europe?

The new Batteries Regulation will ensure that, in the future, batteries have a low carbon footprint, use minimal harmful substances, need less raw materials from non-EU countries, and are collected, reused and recycled to a high degree in Europe.

When does the batteries regulation come into effect?

The Batteries Regulation has started to become applicable on February 18, 2024, meaning that its provisions have legal effect since this day. The Batteries Regulation is the first European legislation that considers the full life cycle of batteries, including sourcing, manufacturing, use, and recycling, all in a single law.

What types of batteries are covered by the batteries regulation?

The Batteries Regulation applies to all batteries, including portable batteries, and more specifically, portable batteries of general use.

What are EU rules on batteries?

EU rules on batteries aim to make batteries sustainable throughout their entire life cycle- from the sourcing of materials to their collection, recycling and repurposing.

Can a member state restrict the production of batteries?

Member States shall not, for reasons relating to the sustainability, safety, labelling and information requirements for batteries covered by this Regulation, prohibit, restrict or impede the making available on the market or the putting into service of batteries that comply with this Regulation. 2.
