

Electric vehicle energy storage segment revenue

How much did Tesla's auto segment revenue increase in a year?

Auto segment revenue increased 5% to \$19.63 billion, energy generation and storage revenue surged 40% to \$1.56 billion, and "services and other" segment revenue jumped 32% to \$2.17 billion. Data source: Tesla. *Calculations by author. YOY = year over year.

Why is Tesla's Energy segment growing so fast?

There are two reasons Tesla's energy segment's percentage of the company's total revenue and earnings have been growing more quickly in recent quarters. First, its revenue and gross profit have been growing in absolute, or dollar, terms. Second, the its core auto segment's revenue growth has slowed and its profitability has declined.

How does Tesla's Energy segment affect gross profit growth?

YOY = year over year. In the last few quarters, Tesla's energy segment has been helping cushion the blow to the overall gross profit growth, which is stemming from the auto segment's declining (Q1 and Q3, 2023) or flat (Q2 2023) gross profit growth. Data source: Tesla.

How will the EV transition affect the global market?
