

Energy storage subsidies in Arab countries

Do energy subsidies affect government expenditures in GCC countries?

Energy subsidies can account for a large share of government expenditures in some GCC countries. In light of fiscal imbalances since 2014, these countries have reiterated their intention to decrease subsidies and substitute them with more targeted support systems. This paper briefly outlines the extent of energy subsidies.

Which region has the most energy subsidies?

The MENA region holds the highest share of global pre-tax energy subsidies, at around \$237 trillion (48%) of global subsidies in 2011, accounting for around 9% of the region's GDP. At the same time, energy resources are abundant, except in some countries such as the net oil-importing countries (Morocco, Tunisia, Egypt, Jordan, and Lebanon).

Where do energy subsidies come from?

Energy subsidies are commonplace across developed and developing countries. Post-tax subsidies accounted for around \$5.3 trillion, or 6.5%, of global GDP in 2015, while they can reach about 13%-18% of GDP in developing countries in Asia, the Middle East and Northern Africa (MENA) region, or the Commonwealth.

What happened to electricity subsidies in Egypt?

For example, in June 2018, Egypt decided to cut electricity subsidies leading to a rise in tariffs of around 26%, while all subsidies are due to be phased out by 2021-2022.

What are the adverse effects of energy subsidies?

El-Katiri and Fattouh explained some of the adverse impacts of energy subsidies such as revenues losses, underinvestment in energy infrastructure, the relatively higher share of subsidies to the non-poor households, energy smuggling due to price differences among countries, or distortions in local energy markets.

How does Saudi Arabia's ethane price affect the petrochemical industry?

For example, in 2016 Saudi Arabia separated the price of methane (sales of gas for power generation) from that of ethane, the price of which increased more than 130%, affecting costs for the petrochemical companies. Furthermore, the agricultural sector is going to endure the costs of increased water and diesel prices.
