

What is Epe solar film used for?

Nowadays, it is especially common to use EPE solar film on both vehicles and building glass. This solar film made of EVA+POE+EVA co-extruded has good sun protection, explosion-proof, and protection capabilities, and is currently used in many fields. When users buy such solar films in bulk, they often have to compare and examine many aspects.

Why is Epe film so popular?

Because EPE film is widely used, there is a demand for EPE film on many occasions, from car sunscreen to building glass sunscreen, etc. If the manufacturer's product has a high market share, it means that its production experience is rich. The quality of the film products is guaranteed, which is why old brand manufacturers are more favored.

Where can I buy bomb blast window film?

Call or buy online for bomb blast window film from The Window Film Company. Nationwide installation service.

The use of modern materials makes window film bomb-blast and explosion proof, which can protect your staff and customers from these destructive forces. Blasts and explosions that occur a distance away from commercial premises still have the power to cause severe injuries to staff and customers as well as property.
