

Why should Germany invest in lithium-ion batteries?

Lithium is considered one of the key raw materials in the energy transition. Lithium is a soft metal and a key part of batteries for electric vehicles. Lithium-ion batteries are already widely used to store energy from renewable sources. Germany is extremely interested in these opportunities, as can be seen in its international partnerships.

When will a lithium-ion battery energy storage system come online?

The lithium-ion BESS is currently under construction, scheduled to come online in the second half of 2024.

Image: Tion Renewables AG. Developer Tion Renewables AG has acquired a 10MW/13MWh battery energy storage system (BESS) project in Thuringia, Germany, whilst pulling out of a deal in the UK.

Why is Germany looking for a lithium source at home?

Germany is signing international agreements to secure the prized raw material while at the same time searching for lithium sources at home. Lithium is considered one of the key raw materials in the energy transition. Lithium is a soft metal and a key part of batteries for electric vehicles.

Who owns a 10mw/13mwh battery energy storage system?

Developer Tion Renewables AG has acquired a 10MW/13MWh battery energy storage system (BESS) project in Thuringia, Germany, whilst pulling out of a deal in the UK. The lithium-ion BESS is connected directly to the German electricity grid and is currently under construction, scheduled to come online in the second half of 2024.

Does Germany have a lithium mine?

At the same time Germany is actively exploring lithium mining within its own borders. The Zinnwald Lithium company plans to set up one of Europe's largest lithium mining operations in Altenberg in the Ore Mountains by around 2030. The company's goal is to extract enough lithium each year for around 600,000 car batteries.

Does Germany support lithium mining in Serbia?

The strategic partnership covers sustainable raw materials, battery value creation chains and electric vehicles, and Scholz said that, with German support, lithium mining in Serbia would meet the "highest environmental standards." At the same time Germany is actively exploring lithium mining within its own borders.

On this property, AMG Lithium will build a production plant for lithium hydroxide battery-grade. The aim is to supply the European battery industry with this key raw material reliably and with short delivery routes. Lithium hydroxide battery-grade is used to produce cathode materials that are installed in cells for lithium-ion batteries.

March 13, 2024: European lead acid battery manufacturer Exide Technologies said on March 11 it had acquired German lithium battery tech firm BE-Power for an undisclosed sum. BE-Power, which develops and assembles battery and ...

Redwood expands its footprint in Europe by acquiring Redux Recycling GmbH, the leading lithium-ion battery recycler. With a state-of-the-art facility in Bremerhaven and a team of ...

Battery and energy storage company Exide Technologies has acquired BE-Power GmbH in Germany and said it plans to develop its lithium-ion technology in existing and new energy storage applications.. BE-Power has ...

SAN JOSE, Calif., Nov 13, 2024 - (BUSINESS WIRE) - Lyten, the supermaterial applications company and world leader in lithium-sulfur batteries, announced today that it will acquire Cuberg's San Leandro lithium-metal battery ...

1 ??&#0183; Li-Cycle claimed the Germany Spoke processes manufacturing trash and old lithium-ion batteries to create black mass, a substance including lithium, nickel, and cobalt, which can ...

Britishvolt acquires EAS, the German-based advanced technology battery cell manufacturer. Battery cell technology pioneer Britishvolt has signed a Sale and Purchase Agreement with the Monbat Group, one of Europe's leading battery solutions companies, to purchase its subsidiary EAS, the advanced technology battery cell innovator and manufacturer ...

EnBW - High-purity lithium from Germany for future battery production. source. Lithium. Gradiant Launches alkaLi, Powered by EC2, the World's Most Efficient Battery-Grade Lithium Production Process ... Arcadium Lithium Receives CFIUS Clearance for Proposed Acquisition by Rio Tinto PHILADELPHIA and PERTH, Australia, Jan. 8, 2025 /PRNewswire ...

BorgWarner announced acquisition of Akasol, a German developer and manufacturer of customizable lithium-ion battery systems for use in buses (including Mercedes-Benz eCitaro), commercial...

July 20, 2023: The Sunlight Group said on July 18 it had acquired 100% ownership of Germany-based Triathlon Holding. The move follows Sunlight's announcement in February that it had acquired a 51% controlling stake in ...

Lithium is considered one of the key raw materials in the energy transition. Lithium is a soft metal and a key part of batteries for electric vehicles. Lithium-ion batteries are already widely used to store energy from renewable ...
