

What is the global silicon wafer manufacturing materials market size?

In recent years, driven by the Internet of Things, big data and artificial intelligence, the global silicon wafer manufacturing materials market has grown significantly. The data shows that the global silicon wafer manufacturing materials market size has increased to 37.343 billion USD in 2021, with a compound annual growth rate of 7.7%.

Who are the top silicon wafer manufacturing companies?

By IMARC Group some of the top silicon wafer manufacturing companies are being GlobalWafers Singapore Pte. Ltd., Okmetic Oy, Shanghai Simgui Technology Co. Ltd., Shin-Etsu Chemical Co., Silicon Materials Inc., Siltronic AG, SK Siltron Co., Ltd., Sumco Corporation, Tokuyama Corporation, Virginia Semiconductor, Wafer Works Corporation.

Which companies shipped the most silicon wafers in 2022?

Meanwhile, silicon wafer companies showed strong performance in 2022. LONGi and TCL Zhonghuan followed Tongwei with 85.06GW and 68GW of silicon wafer shipments in 2022, ranking second and third in the list, while Wuxi Shangji Auto and Gokin Solar also shipped more than 20GW of wafers in 2022.

Why is the silicon wafer market growing?

With the growing demand for advanced technologies such as 5G, IoT, artificial intelligence, and renewable energy solutions, the silicon wafer market has experienced significant growth. This blog delves into the top 10 companies propelling the growth of this market and explores trends, market dynamics, and future forecasts.

Who makes silicon wafers?

SUMCO mainly manufactures and sales silicon wafers for semiconductor industry. It provides high-quality silicon wafers supporting the semiconductor industry at the leading edge. Raw materials with the highest level of quality are used as the silicon wafer material.

Who makes 300mm silicon wafers?

Mitsubishi /Sumitomo Sumco Silicon (Sumitomo Metal Industries): Sumitomo Metal Industries, Ltd. And Mitsubishi Materials Corporation merged and integrated their silicon wafers business, including 300mm wafers and wafer-related quartz product. LDK Solar: Manufacturer of multicrystalline solar wafers.

Okmetic: A technology company manufacturing and further processing high-quality silicon wafers for the semiconductor and sensor ...

Targray - Solar Silicon Wafers for c-Si Solar Cells. Targray offers a full range of solar silicon wafers for solar cell production. Through our extensive global partner network, we have access to a reliable supply of high

quality ...

The increased production capacity of silicon and wafers consolidated the leading positions of the top ones, and the newly added producers such as HOYUAN, JYT, Gokin Solar and Shuangliang expanded ...

The Report Covers Global Solar Photovoltaic (PV) Wafer Companies and the Market is Segmented by Type (Monocrystalline Wafer and Polycrystalline Wafer) and Geography (North America, Europe, Asia-pacific, South America, And ...

Global shipments of silicon wafers are projected to decline 2% in 2024 to 12,174 million square inches (MSI) with a strong rebound of 10% delayed until 2025 to reach 13,328 MSI as wafer demand continues to recover from the downcycle, SEMI has reported in its annual silicon shipment forecast.

On December 20, JYT Corp (SH: 601908), a leading wafer manufacturer in China, told investors that the company has completed the technical reserve for n-type silicon wafers, and its manufacturing equipment can be used to produce ...

Trina Solar expands its global presence by inaugurating a new 210mm monocrystalline silicon wafer production facility in Vietnam. With an annual capacity of 6.5 GW, the factory enhances Trina Solar's global product delivery capabilities. This venture aligns with the company's commitment to sustainable development and smart solar energy solutions.

The data shows that the global silicon wafer manufacturing materials market size has increased to 37.343 billion USD in 2021, with a compound annual growth rate of ...

China, which is the largest producer of solar panels, accounted for 79% of the global production of solar photovoltaic modules in 2022. Companies like First Solar, a leading manufacturer in the solar space, rely on silicon wafers for their thin-film photovoltaic products.

Solar manufacturer CubicPV announced it will discontinue its plan to develop a 10 GW silicon wafer factory in the United States. The company will instead focus on producing tandem solar modules. CubicPV's board of directors cited changing market dynamics, including "a dramatic collapse in wafer prices and a surge in construction costs" as the reason for aborting ...

Company Profile: Global Wafers is a prominent manufacturer of silicon wafers, specializing in the production of 200mm and 300mm wafers. With a global presence, the ...
