China, Energy, solar. China is building a "Great Solar Wall" -- and it will power Beijing. China's "Solar Great Wall" aims to generate 100 gigawatts by 2030, providing renewable energy for Beijing, creating 50,000 jobs, combating desertification, and investing up to \$100 billion in solar infrastructure along the Yellow River.

Between 2017 and 2023, the operational solar capacity in China increased annually by about 40,000 megawatts. The US, in comparison, added an average of just over 8,000 megawatts per year over the ...
