

How much power does a lithium battery blower have

How much power does a leaf blower use?

To calculate the power of your leaf blower, you multiply the voltage to the amps to get the power consumed in watts. So for an appliance of 10 amps and voltage supply is 120V, then the power it consumes is 1200W. For a cordless leaf blower, you can calculate how much power it consumes per battery charge.

What makes a cordless leaf blower a good choice?

Driven by a high-efficiency brushless motor, our cordless leaf blowers are entirely powered by our ARC Lithium(TM) batteries, delivering all the power you need. Significantly quieter and with zero emissions, all our cordless tools, including the battery leaf blower, are high-performance and emission-free alternatives to petrol. Outstanding bit of kit.

Do leaf blowers need a battery?

Turning down the power of the leaf blower, if that's an option, can prolong battery life, but often that makes the tool not suited for most jobs due to a lack of airflow speed. So, your best option is to shell out for a spare battery and remember to keep it charged.

Should you buy a Li-ion battery for a cordless leaf blower?

Li-ion batteries come in different sizes and usually, the ones that are supplied, if they are supplied at all, are on the smaller side. So, it is a good idea to buy a 5ah size battery and use that for your cordless leaf blower instead. If you've never used a leaf blower before, you might be surprised by how much noise they can make.

How loud is a cordless leaf blower?

Noise levels are about what you'd expect from a cordless leaf blower and are, again, nothing really bothersome. With this machine being able to produce airflow speeds of up to 168mph (270kph), you should expect quite a lot of battery drain, and if used on full power, and with the turbo button pressed, you will see that.

Which leaf blower is best?

Makita DUB186Z 18V Li-ion LXT Blower - Easily replaced the previous top pick after testing - [personally tested and proven] Einhell GE-CL 18 Li E Power X-Change 18V cordless leaf blower - best value for money because their overall tool range is super, but definitely worth taking a look at the LawnMaster 24V Cordless Leaf Blower with Battery too
