

How to dismantle the solar cell module in the communication network cabinet

What should you not do with a solar module?

Do not disassemble, modify or adapt the module or remove any part or labelling installed by the manufacturer. Do not drill holes in the frame or glass of the module. Do not treat back sheet and front surface of the module with paint and adhesives. Do not artificially concentrate light on the module.

How to pack solar PV modules?

Inside the box each module is placed vertically. Put the module into the carton from one side with protector on four corners. Citizen Solar recommends that two people should load into and remove the modules from the pack carton for solar PV modules.

What is included in the citizen solar manual?

This manual contains information regarding handling, storage, installation, operation, maintenance and safety handling of Citizen Solar photovoltaic modules. Before installation or using the Citizen Solar PV modules, it is must and important to read this manual and understand the instructions carefully. 02.

How to unpack PV modules?

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the packing box. Modules should be stored in a dry and ventilated environment to avoid direct sunlight and moisture.

What is a LONGi Solar module safety guide?

This guide serves as a reference for inspecting, transporting, unpacking, handling and storing LONGi PV solar modules to ensure safe practices for you and the modules. No matter where you are in the delivery and installation process, LONGi is here to help if something goes wrong.

What should you not do with a module?

Do not drop module or allow objects to fall on module. Do not disassemble, modify or adapt the module or remove any part or labelling installed by the manufacturer. Do not drill holes in the frame or glass of the module. Do not treat back sheet and front surface of the module with paint and adhesives.

13. Drainage holes 14. Cell Figure 1 Modules components and cross-section of the laminated assembly 3.1 Conventional Safety JA Solar Modules are designed to meet the requirements for ...

- o Do not disassemble, modify or adapt the module or remove any part or labelling installed by the manufacturer.
- o Do not drill holes in the frame or glass of the module.

A solar cell is made of two thin layers of silicon, with one layer doped with phosphorus to create excess

How to dismantle the solar cell module in the communication network cabinet

electrons (n-type layer) and the other doped with boron to create excess holes (p-type ...

Protection-Cell Max Cell \geq 3750 mV 1s Max Cell \leq 3340 mV 2 Under voltage Protection-Cell Min Cell \leq 2700 mV 1s Min Cell \geq 3000 mV 3 Over voltage Protection-Battery Module Max Cell \geq 55 V ...
