

How to install the water inlet valve of solar cell

How to install a solar water heater?

Solar water heater can be connected more than in series, parallel way into the collective hot water system. Put the tank on the tank support after the completed assembly. Place the four screw bolts on tank into the tank support, but let the screws not turned tightly temporarily.

How do evacuated tubes work in a solar water heater?

Evacuated tubes absorbs the solar thermal energy, then transfer the heat through the heat pipe to the pressure tank and raises the temperature of the water inside the tank. Evacuated tubes doesn't touch the water, the system can withstand the pressure. In the discharge from the solar water heater without pressure, withstands pressure.

How a solar water heater works?

Product description A9 new generation of integrated pressurized solar water heater, vacuum tube with high solar absorption and low emission to the coating will absorb solar radiation converted into heat, quickly spread to the tank through the heat pipe inserted in the vacuum tube, so that the whole tank water temperature is gradually increased.

How does a solar water pump work?

The batteries installed in the controller are charged by sunshine captured by the solar panel and are used to power the pump. The pump pumps water from the water barrel and to your plants. The pump starts every 3 hours during daylight and stops when the batteries fall to 3v.

How do I connect a water level sensor?

Connect the Water Level Sensor to the controller. Connect a piece of delivery tube long enough to reach your first plant to the pump outlet (marked O), but direct it back to the barrel.

How do I install a water sensor?

The water sensor is fitted, using cable ties provided, to the inlet tubes so that one probe is 2cm above the filter, the other hanging below it. There is a screw connector on the wire close to the controller in case it needs removing. The water level sensor can be turned off - see diagram 2B. Also you can leave the sensor on but turn the buzzer off.

How to connect and install the water inlet hoses to your washer For additional product tips and troubleshooting please visit Whirlpool's product help page: <http://www.whirlpool.com>

The boiler inlet sensor supplied with the solar system should be connected to the boiler control panel (low voltage terminals 8 and 9) and the sensor clipped to the boiler inlet pipe to measure ...
