1 ??&#0183; Ford plans to introduce extended-range electric vehicles (EREVs) across multiple segments, including SUVs and Super Duty trucks, starting in 2027. The decision is in response to market uncertainties and addressing consumer concerns about range and charging infrastructure. EREVs combine electric motors powered by large battery packs with a gasoline-powered ...

One of the most significant updates for the 2025 Kia EV6 is its revised battery options. A new 63.0 kWh battery now serves as the standard offering, paired with a single rear motor producing 167 horsepower and 258 lb.-ft. of torque. For those prioritizing range, an 84.0 kWh battery is available on Light Long Range (LR), Wind, and GT-Line trims.
