

What kind of battery does the fuse use?

The FUSE comes with the latest EVOD 650mAh rechargeable battery, with 5V Circuit protection, unique to Vapouriz and not usually seen with other brands of electronic cigarettes. In addition, the FUSE uses the FUSE 'Bottom fed' Dual Coil Clearomizer. This relatively new technology means that the dual coil is located at the bottom of the clearomizer.

What is a battery terminal fuse?

A battery terminal fuse is an electrical component that replaces a part of a car's battery that isn't protected by a circuit breaker. It consists of a metal strip mounted on a ceramic block that fits into a special clamp. It is connected to the battery with an isolation nut, so all of the current must go through the fuse.
