What is ring main unit (RMU)?

The Ring Main Unit (RMU) shall be installed at 11kV junction points to have a continuous supply by isolating faulty sections. The RMU shall be extensible on both sides and consists of the following combinations of load break switches and Circuit breakers for a nominal voltage of 12 kV using SF6 gas as insulating and Vacuum as arc quenching medium.

What are the requirements for indoor ring main units?

Requirements for Indoor Ring Main Units (only). Energy metering units (4-wire) must be suitable for direct connection to adjacent extensible switch-disconnectors and fuse-switches or circuit breaker RMUs.

What are the requirements for ring main switchgear?

As the ring main switchgear unit is to be installed in ground-mount kiosks (non-walkable) of low profile and compact construction, the Equipment must have minimum dimensions and be of low mass and vandal-proof. Preference must be given to Equipment having minimum dimensions that do not exceed the following:

What are the advantages of ring main unit?

of Ring Main Unit. All switching operations can be made safely to personnel because of interlocking system that operates automatically according to the switch position by the operator. o o No requirement of recharging SF6 gas until its service life. Remote operation available in case of using motor operating

Do I need a routine test for ring main unit?

For components that have not mentioned below, all routine tests as described in the respective Australian or International Standard need to be carried out. Ring Main Unit as per AS 62271.1 and AS 62271.200 All routine tests as described by the above standard need to be carried out.

What is ring main unit & scope of work?

Ring Main Units capable of being monitored and controlled by the SCADA/DMS. Where relevant, the RMU scope of work shall be coordinated with the work to be carried out under the project's other construction packages & associated materials to the designated destinations as per this tender specification and Bill of quantities.
