

# Is it good to have one solar panel for multiple households

Are solar panels a good choice for your home?

Solar panels are one of the most accessible renewable energy solutions and are rising in popularity amongst UK homeowners. Suitable for properties in both rural and urban areas, solar panels can help you to significantly reduce your energy costs as well as your carbon footprint.

How do I choose a solar panel system?

It is important to note that the size of your roof and the amount of sunshine it receives also matter. Another deciding factor is the number of residents in the household. A 6kW solar panel system is recommended for homes with more than five occupants, whereas a 5kW solar panel system is usual for homes with four occupants.

Can I share solar panels between two homes?

If you want to share the output of all the panels between the 2 residences (which is the most efficient way to ensure you maximise solar self consumption) then your only option is to consolidate the 2 meters in to one. An advantage of this is that you should save on standing charges (only having one official grid connection).

What size Solar System do I Need?

A 6kW solar panel system is recommended for homes with more than five occupants, whereas a 5kW solar panel system is usual for homes with four occupants. A 4kW solar system is one of the most popular sizes for domestic solar systems, as it is appropriate for homes with 3 to 4 people.

Can I add more solar panels?

Now it's complicated to add more panels. You could put in a small 12 Volt system and expect to install a larger 24 Volt system alongside once you need it. In that case you may as well go with the least expensive batteries (GC2's) and charging to accommodate them. It may even run that nasty diesel heater as-is.

Are solar panels compatible with UK homes?

Solar panels are very compatible with most UK homes, but that doesn't mean they're always the right fit. Before booking a solar panel installation, it's important to consider whether they'll work for your property as well as your unique situation and energy needs. Things you should consider before investing in solar panels include:
