

What kind of batteries do RVs have?

RVs, Campers, and Vans have two types of batteries. One is a automotive/starter battery that is used to start the engine. The other is a deep cycle battery, also called a house battery, that is used to power your electronics. Your solar panels, if you have them, re-charge your deep cycle /house batteries but do not directly power your electronics.

Which battery is best for RV camping?

The best battery for RV, Van, camper or truck is Dakota Lithium. Deep cycle, marine LiFePO4 batteries are perfect for solar power RV camping.

What kind of battery do I need for my RV & vanlife?

The house batteries are your power source, the rest of your electrical system either gets power to your batteries (charging) or pulls power out (discharging) to run your fridge, lights, etc. Most RV and Vanlife electronics will operate with any deep cycle 12-volt marine battery.

What is a good replacement battery for an RV House?

The drop in replacement battery for most RV house batteries is the Dakota Lithium 100Ah battery [See specs and buy here]. The size of the electronics you are powering determines the size of the battery you need.

Which lithium battery is best for winter camping?

The DL+12V 320Ah battery is the best choice for folks who are winter camping in freezing temperatures, while the Dakota Lithium 100Ah battery is the best choice for smaller RVs and campers. Here's a simple guide to what lithium battery is the best for your vehicle.

Can a DL+ battery be charged while camping?

In addition, the DL+12V 135Ah battery and the DL+12V 320Ah batteries have internal heating for charging while camping in freezing temperatures. The self discharge rate of a Dakota Lithium battery is 1/4 that of a lead acid battery, only 1-2% a month.
