

How do I report a lead acid battery?

Lead acid batteries are considered a mixture containing sulfuric acid, an extremely hazardous substance (EHS) and other non-EHS hazardous chemicals such as lead, lead oxide and lead sulfate. To report a lead acid battery, information on battery weight should be listed on the Safety Data Sheet (SDS).

Can you test a lead acid battery with a hydrometer?

Checking an open-cell lead acid battery--that is, a lead acid battery with caps that can be opened to access the liquid inside--with a battery hydrometer is most accurate when the battery is fully charged. Closed-cell lead acid batteries without the access caps cannot be tested this way.

How do I set a lithium battery?

Setting procedure: 1. Disconnect the module power supply, press and hold the setting button until powering the power module. Display shows the current power setting parameters: 2. Press the setting button to select P/L /F, (P=12V lead acid, L=3.7V lithium battery, F=3.2V lithium iron phosphate battery); 3.
