

What happens if a solar panel is damaged?

Extreme weather events like hailstorms, windstorms, or even a simple installation error can lead to physical damage, such as cracks or shattered glass. This damage can also create another danger - the risk of fire. Damaged panels can overheat, sparking a fire that endangers your property and the people around it.

Should I replace a damaged solar panel?

Replacement is usually the best option for severely damaged panels, such as those with delamination, major cracks, or significant performance loss due to internal cell damage. Replacing a relatively old damaged panel with a more efficient model can also be beneficial, even if it's repairable. Factors to consider include:

What should I do if my solar panel is damaged?

If you suspect a panel is damaged, your first step should be to disconnect it from the system and turn off the electricity supply to that part of your solar setup. Then, carefully assess the damage. If you see exposed wires, shattered glass, or other significant issues, do not attempt to repair it yourself.

Are solar panels dangerous?

If there are exposed wires or damaged connectors, the risk of electrical shock increases. So, if your solar panel has seen better days and is sporting cracks or exposed wires, be cautious - it's not just your energy bill that could shock you! 2. Fire and Burn Risks Solar panels may be built to withstand a lot, but they're not invincible.

What causes a solar panel to fail?

It can result from vandalism or severe weather conditions like hail, debris impacts, or falling branches. Even minor cracks can compromise the panel's ability to absorb sunlight efficiently, reducing energy output. Microcracks -- Tiny fractures within the solar cells.

Can inclement weather damage solar panels?

While there's little a homeowner can do to prevent solar panel damage resulting from inclement weather, there are several ways to keep panels operating efficiently the rest of the time. Regularly inspect your solar panels for damage. Keep tree and bush branches away from your solar panels.
