

# National Energy Administration promotes energy storage development

What are the Development Goals for new energy storage in China?

The plan specified development goals for new energy storage in China, by 2025, new energy storage technologies will step into a large-scale development period and meet the conditions for large-scale commercial applications.

How is the government advancing energy storage technologies?

The government has been continuously advancing energy storage technologies, with several compressed air energy storage, flow battery storage, and sodium-ion battery storage projects put into operation across the nation, Bian Guangqi, an NEA official, said at the conference.

How will new energy storage technologies develop by 2030?

By 2030, new energy storage technologies will develop in a market-oriented way. Newer Post NDRC and the National Energy Administration of China Issued the Medium and Long Term Development Plan for Hydrogen Industry (2021-2035)

What is the NEA 'promotion of new energy storage integration & dispatch utilization'?

The NEA issued a notice in April titled "Promotion of New Energy Storage Integration and Dispatch Utilization", aimed at standardizing the integration of new energy storage into the grid and promoting efficient dispatch utilization of new energy storage.

Where are new energy storage facilities being built?

According to the administration, the northern and northwestern parts of the country have seen the fastest development of new-type energy storage facilities, accounting for over 50 percent of the newly operational energy storage installations nationwide.

What is new energy storage?

New energy storage, or energy storage using new technologies such as lithium-ion batteries, liquid flow batteries, compressed air and mechanical energy, is an important foundation for building the country's new power system, which enjoys advantages such as quick response, flexible configuration and short construction timelines.

China National Energy Administration issued the Notice Related to Promoting the Large-scale Development of Concentrated Solar Power. Recently, China National Energy ...

Speakers: Mr. Zhang Jianhua, administrator of the National Energy Administration (NEA) Mr. Li Fulong, director general of the Department of Development and ...

## **National Energy Administration promotes energy storage development**

Recently, the National Energy Administration officially announced the third batch of major technical equipment lists for the first (set) in the energy sector. The "100MW HV ...

On November 27, the National Energy Administration released its No. 5 announcement for 2020, approving 502 energy industry standards. Seven of the announced ...

Newer Post Promoting The High Quality Development Of Vanadium Titanium Industry" lauched by Sichuan Provincial Department of Economy and Information Technology. ...

In 2023, the Party Group of the National Energy Administration (NEA), guided by Xi Jinping's Thought on Socialism with Chinese Characteristics for a New Era, deeply ...

new type storage are included in the 2023 energy work of the National Energy Administration (NEA).<sup>2</sup> Energy electric industry is required to develop safe and economical new types of ...

On March 21, 2022, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) jointly released the Implementation Plan for the Development of ...

capacity, and high-efficiency energy storage, mobile energy storage for vehicles, etc.<sup>3</sup> Figure 1 China's cumulative installed capacity of new type energy storage by 2023 Source: National ...

The Blue Book on the Development of New Power Systems, recently published by China's National Energy Administration, promotes the low-carbon development of energy ...

On April 29, in the National Energy Administration held a press conference, the National Energy Administration of energy conservation and science and technology equipment department ...
