

What is solar-powered lighting?

Solar-powered lighting is a great solution to bring light into an outdoor area. This type of energy uses photovoltaic panels in order to convert sunlight and store it as electrical power, which can be used during the night for lights.

How do I choose the best outdoor solar lights?

Choosing the best outdoor solar lights for your needs depends on where they need to go. Most have photovoltaic cells on the body of the light, so they'll need to be placed in an area that gets plenty of sunlight.

Which outdoor lights are best?

So, if lights need to be portable, solar or battery-powered is best as there are no wires to worry about. Solar and battery-powered lights are also easier to install, but they won't be as bright or last as long as mains-powered lights. Most outdoor lighting comes with or uses LED bulbs.

Are solar lights eco-friendly?

Solar lights provide a great and eco-friendly way to brighten outdoor spaces in various forms like pathway lamps, lanterns or fairy lights. Operating on the power of the sun alone, these solar centres are energy efficient as well as environmentally friendly lighting solutions for your needs.

Are solar lights good for your garden?

Solar lights are environmentally friendly lighting and with a good set, you can create an ambience that lets you enjoy your garden long after dark. Powered by solar panels, they absorb daylight and convert it to electrical energy, charging your lights so they're ready to go at night.

How do I choose a power source for exterior lighting?

Choosing a power source for exterior lighting is often down to how bright or reliable the lights need to be and how close they will be to the house. Mains-powered is ideal if the light will be attached to or close to a house. It's also the most reliable source as the lights will burn consistently and brightly for as long as you need them.
