

How has Cambodia's energy sector changed over the past 20 years?

Cambodia's Energy Sector has made tremendous progress over the past 20 years. From experiencing frequent power cuts in the capital city, and having very limited electricity access in rural areas, the country is now able to ensure stable electricity access in Phnom Penh and a village electrification rate over 98%.

Does Phnom Penh have electricity?

The Phnom Penh Grid System supplies power to Phnom Penh, parts of Kandal, Kampong Speu and Takeo Provinces". (Page 45, EAC 2010) In addition, "Electricité du Cambodge (EDC), comprised of one diesel power plant (C3) and two thermal power plants (C5 and C6) and small three diesel generator plants, supplies electricity to the Phnom Penh Grid System".

Who generates electricity in Cambodia?

Electricity in Cambodia is generated by independent power producers as well as by Cambodia's national electricity utility, Electricité du Cambodge (EDC), and rural electricity enterprises that supply consumers connected to their distribution networks. 5. Planning, policy, and institutional strength evolving.

How can Cambodia improve the energy sector?

Planning, policy, and institutional strength evolving. Cambodia is starting to structure a more cohesive energy sector strategy, linking policies and physical infrastructure investments. Improved governance and data-driven strategies can support increasing growth, security, and affordability.

Will EV charging stations be installed in Phnom Penh in 2022?

The Cambodian Ministry of Public Works and Transport (MPWT) is hoping to promote electric vehicles (EVs) in Phnom Penh and has again confirmed the installation of EV charging stations in 2022.

Does economic growth drive energy demand in Cambodia?

Economic growth drives energy demand. Robust economic growth in Cambodia has led to a sustained increase in energy demand. From 2010 to 2019 total primary energy supply (TPES) increased by 64%, from 190,567 terajoules to 312,773 terajoules.⁴ Cambodia's energy supply remains heavily reliant on biomass, which accounted for 45% of TPES in 2019.
