What is a lead acid battery container?

Lead Acid Battery Container - for safe battery storage and transportation. The Battery Transport & Storage (BTS) Container was purposely designed as a lead acid battery container, for the regulation compliant, safe and environmentally responsible storage and transportation of used lead acid batteries.

What is the packaging standard for used lead acid batteries?

PACKAGING STANDARD FOR USED LEAD ACID BATTERIES (ULAB) 1. INTRODUCTION This is a voluntary industry standard for packaging used lead acid batteries (ULAB) for transport to a recycling facility. Meeting the standard will ensure acceptance by the carrier and the recycling facility and avoid the inconvenience and cost of consignments being rejected.

How do I dispose of lead acid batteries?

Lead acid batteries require segregated disposal. We have designed our large, plastic battery box with a secure lid so that you can use it to store, transport and dispose of these batteries safely. Biffa offers convenient battery disposal near you.

What are lead acid batteries used for?

Lead acid batteries are used for various applications, including cars and other automotive uses, as well as for solar, UPS, and other industrial applications. Batteries collected mainly include these types, and the popularity of the service and BTS Containers for their transport is growing every year.

Are wet lead acid batteries toxic?

Wet lead acid batteries, such as most car batteries, contain high levels of toxic lead and other heavy metals in their sulfuric acid electrolyte. The World Health Organisation (WHO) has identified lead as one of the 10 chemicals of major public health concern.

What is the best way to transport used lead acid batteries?

The recommended way to transport used lead acid batteries (ULABs) is on a wood pallet, which is popular due to its low cost, widespread availability, and convenience. However, transporting ULABs on a wood pallet has several significant drawbacks, including...

General Wet Battery Packaging Guidelines

- o Package wet-cell batteries in containers, including metal containers, with acid/alkali leakproof liner -- sealed to prevent leakage.
- o Fasten batteries securely with fill openings and vents facing up to prevent short-circuiting or overheating.

A container for lead-acid auto battery recycling has a tough life. "EU Approved, leak-proof, strong and long-lasting." These are some of auto battery recyclers' demands of waste battery containers. Although
