

Should you use a battery during a power cut?

Many of us recently experienced a major national power cut, one that would have been worse had it not been for grid battery storage. In the same way, a battery is a good option to help get us through power cuts in the home and keeping the lights on. Watching the clock in a power cut (Image: gentleflamechen/Pixabay)

Can you run a home off a battery during a power cut?

It is possible to run a home off a battery during the power cut, but the controls for a conventional home battery are not currently good enough - if they don't operate 100% perfectly, there would still be the risk of electrocution, and if the battery does not operate properly it does not 'fail safe'.

What happens if a power cut happens?

In the event of a power cut, a homeowner can manually turn off all high power loads, and engage a full house switch over where your home demand is now supplied directly from your battery. This is done by rerouting the incoming grid connection and the house main consumer unit, to go through the battery system instead.

What do you need to know about solar batteries & power cuts?

Here's what you need to know about solar batteries and power cuts. When you don't use all the energy generated by your solar panels during the day, a solar battery can store the excess so you can use it at another time. For example, at night or on particularly cloudy days when your panels aren't generating as much energy.

What should I do if I have a power cut?

Keep a battery or wind-up radio (and spare batteries) at home. There might be updates communicated by radio during a power cut. A car radio can be used, however in severe weather it might be safer to stay inside. Write down on paper the frequencies of any local or national radio stations you use for news updates.

How do you prepare for a power cut?

To prepare for a power cut you could fill plastic bottles with water and add them to gaps in your freezer to help keep it colder for longer. Check the guidelines for eating food in a power cut on the Food Safety website. Some pets can get upset during a power cut.
