Cast Aluminium Scrap Metal Aluminium Turnings Scrap Metal Scrap aluminium is relatively cheap compared to some of the other types of scrap metal. Aluminium prices, for most scrap yards in the UK, tend to vary between £0.50 per kilo and £2.

How much does scrap lead cost in the UK?

Scrap lead prices in the UK are often around £1-£1.15 kilo, this is equivalent to between £1,000 and £1,150 per tonne. Scrap iron prices are also fairly low at the moment. The cause of this price recession for the metal is unknown, however it is likely due to either a drop in demand or increase in supply.

How much does scrap brass cost?

As it stands, scrap brass prices are relatively low compared to the other metal types on this page. You can expect to receive anywhere between £2 and £3 for a kilo of the metal, or £2000 to £3000 for a tonne. Most scrap yards in the UK do accept brass, but you will find that the prices between them vary wildly. 316 Stainless Steel Scrap Metal

How do I find the value of scrap metal?

Figuring out the value of scrap metal can seem like a daunting task for many. However, it ultimately depends on the type of metal, its weight, and the current market price for that particular metal. To find metal's precise worth, it's essential to keep yourself updated with the most recent scrap metal prices.

Are tantalum capacitors worth anything?

Even expired or blown tantalum capacitors have worth due to the rare earth mineral tantalum they contain. Keep in mind, though, that recycling a single capacitor may not yield much cash unless it contains valuable elements or you have a large quantity of them. In other words, selling scrap capacitors is more profitable in bulk.
