

Did the Romans use wet-cell batteries?

There does seem to be at least some evidence of wet-cell batteries being used on the peripheries of the Roman Empire. The famous Baghdad Battery is more closely related to the post-Persian Parthian Empire, but these two ancient super powers shared borders, Greek culture and technology. Okay, so what was the Baghdad battery?

When was the Baghdad Battery discovered?

The debate continues, as does the quest to unlock the secrets of our electrochemical past. The Baghdad Battery was discovered in 1936 at Khujut Rabu, near Baghdad, Iraq, not far from the historical metropolis of Ctesiphon, the capital city during both the Parthian (150 BC - 223 AD) and Sasanian (224-650 AD) empires.

How old is the Baghdad Battery?

The Baghdad Battery, otherwise known as the Parthian Battery, was an artefact hypothesised to be an ancient version of a battery. Asked by: Edward Seymour, Hove Found in 1938 by a German archaeologist, the 'Baghdad Battery' could be 2,000 years old, and consists of a clay jar, a copper cylinder and an iron rod.

What is R Baghdad Battery?

Credit: Midjourney for GreekReporter The Parthian Battery, Or Baghdad Battery, is one of the most fascinating inventions of the ancient world preceding by almost two millennia the batteries we use today.

What did the Romans and Egyptians use to numb their pain?

During this period the Romans and the Egyptians were using bio-electric fish - such as the Torpedo Fish (the electric ray) - to numb severe pain; including gout, child birth and migraines. One could imagine an electric ray would be hard to find in the Mesopotamian deserts, so a 'clay ray' battery might have been a worthy alternative.

What is a Parthian Battery?

The Parthian Battery, also known as the Baghdad Battery, is one of the most fascinating inventions of ancient times, predating the batteries we use today by 2,000 years. Credit: Midjourney for GreekReporter
