

What is a solar powered LED street lighting system?

HeiSolar's solar-powered Led street lighting systems are an efficient means to provide lighting without the need for utility power. Every Stand-alone off-grid lighting system provides cost savings by eliminating the need to trench standard electric wires for installation and providing no electric bill for the lifespan of the lighting system.

How much do solar street lights cost?

This considers costs for components, installation, maintenance, and electricity bills. During the 15-year lifespan, traditional lampposts cost around \$12,000. Solar street lights with motion sensors or different models, only cost around \$5,000-\$6,000 for that same period, making them cheaper and more cost-efficient.
