

How do I install roof-integrated solar panel roof tiles?

Roof-integrated solar panel installation is a simple process with Marley SolarTile™ - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

Can solar panels be installed on a tiled roof?

Installing solar panels on roofs is a popular choice for several reasons: low chances of shade from nearby objects, ample space that serves no other purpose, and closeness to your home. How are solar panels fixed to a tiled roof? Solar panels are mounted on a system of rails and roof hooks. The rails float above the roof tiles.

How do I install a solar roof?

For battens of other sizes or sarked roofs, alternative kits are also available. Begin by installing the first solar roof panel in the array - this should be the one located on the bottom left. Work up each column, then move to the right. The tiles can be installed in either landscape or portrait orientation using the same method.

Can I install solar panels on a slate roof?

Not all roofs, including tiled roofs, are suitable for solar panel installation. To determine if your slate roof is compatible, several factors must be considered. Firstly, assess its structural integrity as solar panels add weight to the roof. If needed, reinforce or repair any weak areas before proceeding with installation.

How do I install the Marley solartile™ system?

See how simple it is to install the Marley SolarTile™ system. The solar panels and flashings can be fitted to the roof first and then the roof covering fixed around them. Integrated solar panels are also easy to install as a retrofit option. Simply remove the necessary section of roof tiles or slates, and replace with the solar panels.

How do I install tiles?

The tiles can be installed in either landscape or portrait orientation using the same method. The installation process is quick and easy: brackets are fixed into place, the first panel and flashing are installed, then joining strips are attached so the next panel can be pushed into place for a weather-tight and secure finish.
