

What are the regulations relating to waste batteries?

The specific obligations in relation to waste batteries depend on their type, but all require registration with the appropriate environmental regulator via the National Packaging Waste Database.

What types of electronic and electrical equipment waste are disposed of?

Common electronic and electrical equipment waste includes products like batteries, light bulbs, fridges, and TVs. The tables list most waste codes for electronic equipment waste disposed of in United Kingdom. Review the technical guidance for additional classifications not found in these waste code tables.

Are batteries and accumulators regulated in the UK?

In the United Kingdom (UK) batteries and accumulators are regulated to help protect the environment through the Waste Batteries and Accumulators Regulations 2009 (as amended) - the underpinning legislation: An automotive battery is of any size or weight and used for one of the following:

Who needs to record the tonnage and chemistry of batteries?

Producers- manufacturers and importers - must record the tonnage and chemistry of the batteries they place on the market and provide this information annually via the National Packaging Waste Database. In addition:

How do I store and treat waste batteries?

There are rules on how you must store, sort and treat waste batteries. You must store all waste batteries you accept as an ABTO or ABE in places with impermeable surfaces and suitable weatherproof coverings. Or the containers you use must have similar characteristics.

What is a hazardous waste code?

Components such as screens, circuit boards, batteries or any plastic parts may contain hazardous chemicals or POPs. (\*) An asterisk at the end of a code means the waste is hazardous. Components such as circuit boards, motors and any plastic parts may contain hazardous chemicals or POPs. Coolants and foam may also be hazardous.
