

Transnistria subsidizes new energy batteries

Does Russia still buy energy from Transnistria?

Despite ending gas purchases from Russia, it still bought large amounts of its energy from Transnistria, which uses Russian gas to generate electricity at the Cuciurgan power plant. The Cuciurgan power station in Transnistria turns Russian gas into electricity, some of which it sells to Moldova.

Why is Transnistria struggling with energy crisis?

Moldova's pro-Russia breakaway region of Transnistria is grappling with an energy crisis after Russia cut off gas shipments to the country at the New Year, leaving residents without reliable gas and electricity in the middle of winter.

Does Transnistria have electricity?

Historically, Transnistria had covered most of Moldova's electricity needs through the Cuciurgan power station, which functioned with Russian gas supplied to Transnistria for free.

Can Russia end the energy crisis in Transnistria?

Russia may also stand to gain from declining to end the energy crisis in Transnistria - whose people it claims to support. Russia has long worked to destabilize Moldova, most recently in its presidential election in October, which was framed as a choice between Moscow and the West.

Why did Russia turn off gas in Transnistria?

Transnistria, a sliver of land home to over 450,000 people bordering Ukraine, has long relied on free gas from Russia, which also provides electricity for the region. But Moscow turned off the taps on Jan. 1, citing unpaid debts by Moldova.

Could Moldova cut off energy payments to Transnistria?

In an article for the Harvard International Review, Lizzie Place noted that the Moldovan government could theoretically cut off all energy payments to Transnistria to put pressure on the region to re-integrate.

Despite ending gas purchases from Russia, it still bought large amounts of its energy from Transnistria, which uses Russian gas to generate electricity at the Cuciurgan ...
